

SUSTIRA – SAP EHS BASIC FOUNDATION COURSE

Sustainability • Safety • Future-Ready Careers

SUSTIRA presents a comprehensive SAP EHS (Environment, Health & Safety) training program designed for students, professionals, industries, and sustainability enthusiasts. This course provides practical knowledge, industry exposure, implementation concepts, and career-oriented training in SAP EHS modules.

Our Vision

To empower learners with sustainable industrial knowledge and create skilled professionals capable of supporting safety, compliance, environmental responsibility, and digital transformation.

SAP EHS Course Modules

- Introduction to SAP EHS – Overview of SAP ERP, EHS architecture, business processes, and industry applications.
- Product Safety – Material safety data management, dangerous goods handling, labeling, and regulatory compliance.
- Industrial Hygiene & Safety – Risk assessments, accident management, occupational safety processes, and compliance monitoring.
- Waste Management – Waste tracking, disposal management, recycling concepts, and sustainability practices.
- Occupational Health – Medical surveillance, employee health tracking, and workplace wellness processes.
- Dangerous Goods Management – Transportation regulations, packaging standards, and hazardous material handling.
- Incident & Risk Management – Incident recording, root cause analysis, corrective actions, and preventive strategies.
- SAP EHS Integration – Integration with SAP MM, PP, QM, HR, and logistics modules.
- Real-Time Industry Scenarios – Hands-on case studies, implementation examples, and reporting exercises.
- Project Guidance & Career Preparation – Resume preparation, interview guidance, and project exposure.
